Journal of Parallel and Distributed Computing

Editors-in-Chief: Kai Hwang and Leonard Uhr

Academic Press journals in computer science — Reports of research theoretical advances, innovative designs, and practical applications

Journal of Parallel and Distributed Computing is an international publication directed to researchers, engineers, educators, managers, programmers, and users of computers who have particular interests in parallel processing and/or distributed computing. The Journal publishes original research papers and timely review articles on the theory, design, evaluation, and practices of parallel and/or distributed computing systems. It intends to provide a timely and effective forum for communication among researchers from various scientific disciplines working in a wide variety of problem areas, sharing a fundamental common interest in improving the ability of computers to solve increasing numbers of difficult and complex problems as quickly and as efficiently as possible.

Volume 1, 1984, 2 issues, ISSN: 0743-7315/In the U.S.A. and Canada: $35.00; Outside the U.S.A. and Canada: $41.50

Volume 2, 1985, 4 issues/In the U.S.A. and Canada: $70.00; Outside the U.S.A. and Canada: $83.00

New in 1985

Journal of Symbolic Computation

Editor: B. Buchberger

This Journal will publish original articles on all aspects of the algorithmic treatment of symbolic objects (terms, formulae, programs, and algebraic and geometrical objects). The emphasis will be on the mathematical foundation, correctness, and complexity of new sequential and parallel algorithms for symbolic computation. In addition, articles also include descriptions of working software systems for symbolic computation and of general new design principles for symbolic software systems and applications of such systems for advanced problem solving.

Information and Control

Editor: Albert R. Meyer

Information and Control presents original articles in all areas of theoretical computer science, information theory, and control theory. Articles contributing new results to active theoretical research areas are welcomed, with particular attention given to papers that reflect computational or interdisciplinary concerns.

Volumes 60-63, 1984, 12 issues, ISSN: 0019-9958
In the U.S.A. and Canada: $300.00
Outside the U.S.A. and Canada: $353.00
